

## Waterco Vietnam Swimming Pool

Dak Lak, Vietnam

*Bringing a Dream to Life: A Pool That Reflects Comfort, Functionality and Serenity*

# Swim, Play, Relax—The Pool That Has It All

## One Pool, Three Wishes: A Family's Perfect Escape

When a family in Dak Lak, Vietnam set out to build their dream pool, they weren't just looking for a place to swim—they wanted a space where everyone could come together. But creating the perfect pool can be challenging, especially when different family members have different expectations.

For Dad, it has to feel like the ocean. Having grown up by the sea, he wants a swimming experience that mimics the sensation of gliding through open waters, with a steady current pushing against him. The kids dream of an interactive water play area, where water jets and streams bring the pool to life. Mom? A jacuzzi. A peaceful corner of the pool where she can unwind, away from the splashing and excitement. And with Dak Lak's highland climate, the pool needs to stay warm year-round, so the family can enjoy it no matter the season.

To turn their vision into reality, they engaged ANZA Investment Construction Company Limited (ANZA Pool), a trusted contractor known for its expertise in pool construction. With ANZA Pool handling the project and Waterco solutions incorporated into the design, the result is a pool that seamlessly combines functionality, relaxation and fun—perfectly tailored for the whole family.

### Where Smart Design Meets Everyday Enjoyment

Designing a pool that meets multiple needs requires the right technology working behind the scenes. Waterco's cutting-edge equipment ensures that every part of this pool is functional, enjoyable and easy to maintain.

### Bringing the Open Water to the Backyard

For Dad, the pool recreates the challenge of swimming against a natural current. With **Hydrostorm 200**, **Hydrostorm Plus 300** and **Supatuf 100 Pumps**, the system generates a smooth, continuous flow of water, allowing him to swim freely without ever reaching the edge. It's a simple but powerful setup that lets him train, exercise and unwind—all in the comfort of his own home.

### Water, Wonder and Endless Fun

To keep the kids entertained, the pool features a dynamic water play area, with strategically placed nozzles that release bursts of water from below and gentle streams from the sides. These elements add movement and excitement, transforming the pool into a fun, interactive environment. Keeping the water fresh and clear is effortless thanks to the **Multicyclone 16 Pre-Filters**, which capture debris before it even reaches the main filtration system, reducing maintenance and keeping the fun going.

### Mom's Private Spa, Right at Home

After a long day, Mom gets to enjoy a quiet space to relax, and a jacuzzi corner provides the perfect retreat. **WhisperAir S Spa Blowers** create a steady stream of soft, bubbling water without excess noise. Now, she can soak in complete tranquillity whenever she needs a moment of peace.

### More Than a Pool—A Year-Round Retreat

With Dak Lak's cooler highland climate, the family needs a heating solution that would let them use the pool no matter the season. The **Electroheat MKV 23kW Heat Pumps** are the perfect fit—they efficiently use ambient air to heat the water, providing a cost-effective and eco-friendly way to extend their swimming season.

### A Pool That Practically Takes Care of Itself

Keeping a pool clean and balanced shouldn't feel like a full-time job. That's why this pool is designed with an intelligent, low-maintenance water management system that keeps everything in check automatically.

The **Solclear 300 UV Sterilisers** ensure that the water stays fresh and bacteria-free by using powerful UV technology, meaning fewer chemicals are needed. To take things further, **Electrochlor Mineral 5000** units automate the sanitation process, eliminating the hassle of manually adding chlorine.

Balancing pH and chlorine levels can often be a headache, but with Chemflo Plus, the pool pretty much monitors itself. This smart system continuously adjusts the water balance, making sure it's always safe, comfortable and crystal clear. Finally, Micron S900 Fibreglass Filters provide long-lasting, corrosion-resistant filtration, ensuring water clarity with minimal maintenance.

*Behind the Scenes: The Precision and Technology That Maintain a Seamless Pool Experience*

### A Pool That Feels Like Home

What started as a simple vision turned into a stunning, multi-functional pool that brings the whole family together. Dad gets his endless swim sessions, the kids have their play zone and Mom has her personal spa retreat. Thanks to Waterco's expertise and innovative technology, the family now enjoys a perfectly balanced pool experience—effortlessly.

It's not just a pool. It's a lifestyle upgrade.

*A Timeless Retreat Designed for Endless Enjoyment and Built to Enrich Every Moment*
